

Full-Stack Software Developer (m/ f/ d)

Our mission is to protect the eyesight of patients with retinal diseases. For this purpose, the international team of OD-OS has been working worldwide closely with physicians and clinical experts for more than 10 years. Our unique navigated laser therapy system Navilas® sets a new standard in retinal treatment application field.

Join our team! Have an impact of improving the retinal navigation platform and be a part of driving the innovation of further ophthalmic therapy devices. Implement with our development team innovative solutions for real-time display of high-quality medical imaging.

Your role:

You are accountable for the specification, development, maintenance, and verification of different software solutions for medical systems. Your field of activity is the development of software concepts and feasibility studies, software architecture and solutions as well as their documentation. Furthermore, your role includes the system integration in cooperation with our product design-, optics- and hardware team. You will supervise the transition of our software solutions until they are transferred to production and further to our customers.

Your profile offers:

- A university degree in computer science, mathematics or comparable, with a professional experience of at least 3 years
- Very good knowledge in object-oriented programming (C#, C, C++) and application development including user interface (GUI) in .NET/.NET Core
- In addition, experience and knowledge in computer vision, multithreading, real-time applications and scripting environments (Python, etc.) are desirable
- Ideally, experience in dealing with medical regulations and documentation
- A quality-focused way of working with attention to details, with team spirit and good communication skills
- Secure English and German language skills, both spoken and written

Our offering:

We offer an exciting and diversified job in a growing, innovative company. In our interdisciplinary and agile working teams is plenty of room for initiative and personal development.

Our flat hierarchy opens the possibility for strong team spirit, which we additionally strengthen at annual summer and Christmas team events.

You can also look forward to attractive conditions and an above-average bonus system.
