

NAVILAS®

Software Developer Application (m/ f/ d)

Protecting the eyesight of patients with retinal diseases is our mission. The international team at OD-OS has been working closely with doctors and clinical specialists around the world for more than 10 years to further improve retina treatment with our unique navigated Navilas® laser system.

Shape the digitalization of retina therapy with us! Become part of our agile software development team and use Navilas to create innovative solutions for real-time display of high-quality imaging and retina treatment.

Your task

- Design of software solutions, their implementation, testing and documentation
- Research and active selection of suitable technologies
- Design of the software architecture

Your profile

- University degree in computer science, mathematics or comparable work experience
- Object oriented programming (C #, C, C ++)
- Application development including user interface (GUI) in .NET
- Knowledge of database-based development using SQL
- Ideally experience in dealing with multithreading and scripting environments (Python etc.)
- An independent, quality-conscious way of working, team spirit and good communication skills
- A good command of spoken and written English and German

We offer

- Active participation in the further development of a unique medical device and creative influence on product design.
- Working in a fast-growing, innovative company with flat hierarchies and short decision-making processes
- Independent work in an agile, interdisciplinary team based on SCRUM
- Good work-life balance, flexible working hours and performance-related remuneration
